

## CHECKLIST FOR DRONE PILOTS

- I have read aviation regulation Traficom OPS M1-32.
- I will not exceed the distances or altitudes set by OPS M1-32. I do not need a separate permit.
- I will exceed the distances or altitudes set in OPS M1-32. Piloting a drone requires a separate permission from the air traffic service unit of the airport.
- I need a permission but the air traffic service unit is not open. I will comply with the terms and conditions of distance and altitude stipulated in OPS M1-32.
- The piloting will take place in the vicinity of Utti or Jyväskylä airport (radio mandatory zone). A permit from the air traffic services unit is always needed.
- I have asked for a permit for more than two weekdays (Helsinki Airport five weekdays) before the intended date.
- I am aware of possible restrictions and terms set by the air traffic service unit.
- I have called the air traffic service unit before piloting the drone if the air traffic service unit has set that as a requirement in the email I received.
- I have informed the air traffic service unit that I have finished flying the drone in case the ATS unit has set that as a requirement in the email I received.
